FAITH GUITARS' NOMAD: TRAVEL GUITARS

Small-scale powerhouses, Faith Nomad models are designed for those players who want and need to travel frequently with their guitar, but dont want to compromise on sound quality. Despite their smaller size, Faith Nomad guitars still use solid tonewoods for the top, back and sides of each instrument, ensuring the tonal richness for which Faith are known. And to finish the whole thing off, each Nomad guitar comes complete in a specially made gigbag.

FAITH GUITARS' NEXUS

With simplicity at the forefront of their design, Faith Nexus have use Solid Mahogany for the top, back and sides of each instrument. Using wood treatment techniques, each guitar is then finished with a gloss lacquer to ensure both tonal focus and a harder-wearing skin. All model variants are supplied with electronics; the Venus cutaways using a side-mounted Fishman preamp and the Neptunes using a discreet soundhole-controlled Fishman Sonitone system.

FAITH GUITARS' NAKED

The top and body of each of the Faith Naked instruments is 100% solid tonewood – in keeping with all other Faith series. However, the cosmetics and non-essential dressing has been stripped away, leaving the guitars in their natural, Naked state. Satin finished all over, the tonewood is almost entirely unrestricted in its resonant movement, so the tone delivered is far beyond what is normally expected at this price level.
